AIRDROP GENESIS · STEP-BY-STEP GUIDE

How to join the Sectorsa airdrop, **step by step.**

This guide takes you from your **very first click** to a **Hash Node that is on and counting**. Every step says exactly what to press, what you should see and what not to do, with a screenshot. Read one step, do it, then go to the next.

THE WHOLE AIRDROP IN ONE SENTENCE

You need only two things, **with the same wallet**:

1 #SECT in staking

At least 100 #SECT in the official staking, on Ethereum. Part A.

2 Your Hash Node turned on

One click in the dashboard. 100% free. Part B.

When both are true, your airdrop count starts by itself. **No sign-up, no forms.**

**Already staking #SECT? You're already in.**

You don't have to do anything else with your staking. **Don't withdraw anything.** Skip Part A and go straight to Part B: just turn on your Hash Node **with the same wallet you stake with**, and you start taking part.

PART A · STEPS 1-7

Stake your #SECT

Ethereum mainnet. Uses your real #SECT and a little ETH for the fee.

PART B · STEPS 8-11

Turn on your Hash Node

One click in the dashboard. Free: no test coins and no gas.

PART C · STEPS 12-13

Check your airdrop

See your level, your prize and your count growing.

00 • BEFORE YOU START

Have these **four things** ready.

01

A crypto wallet

MetaMask, Trust Wallet, Coinbase Wallet, OKX, Binance Wallet or any Ethereum wallet. On your phone or your computer.

02

At least 100 #SECT

In that wallet. Don't have them yet? Buy them on Uniswap with our step-by-step buying guide.

03

A little ETH

On Ethereum, in the same wallet. It pays the network fees (a few dollars).

04 • MOST IMPORTANT

ONE wallet for everything

Your staking and your node must use the **same wallet address**. Using two different wallets is the most common mistake.

Three safety rules. Never break them.

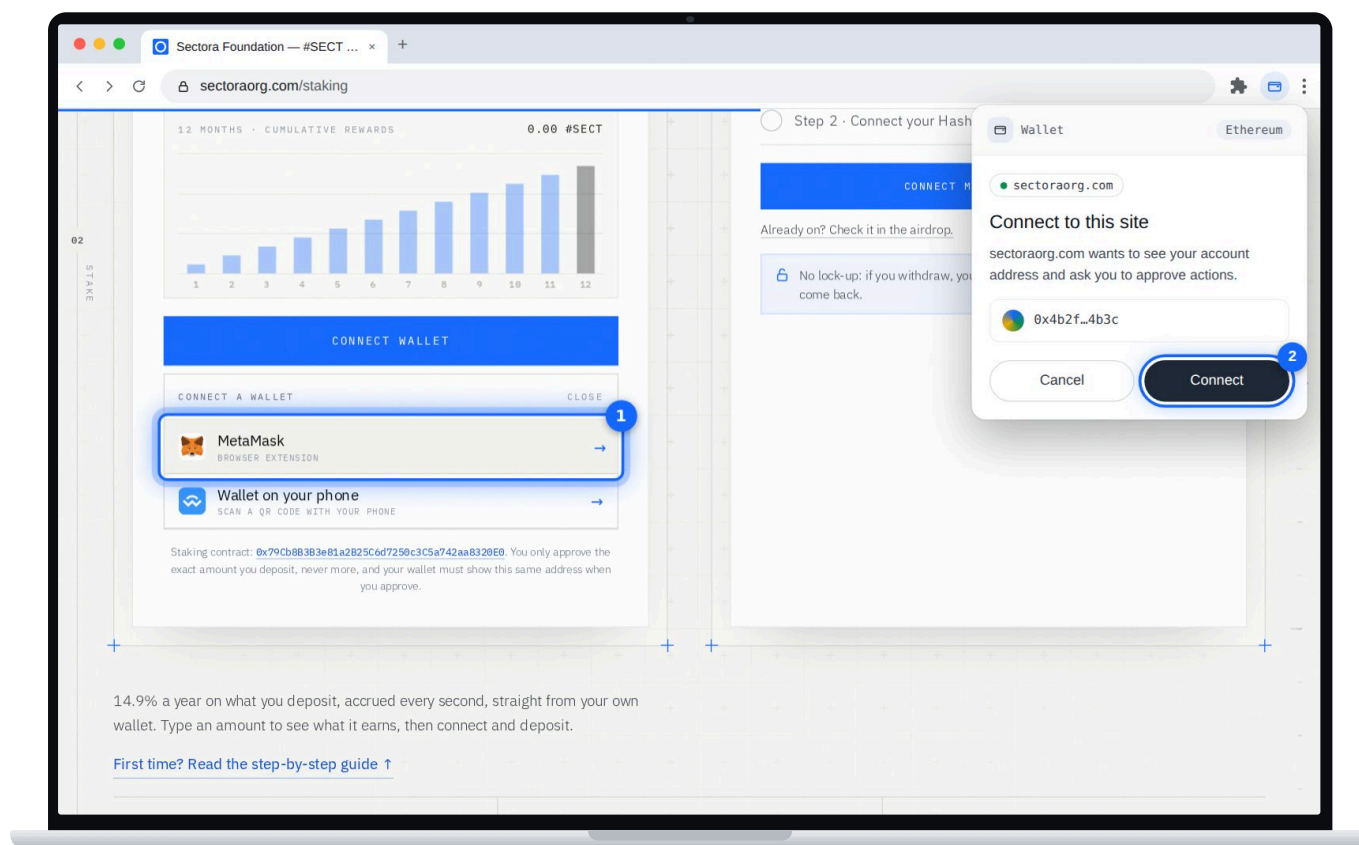

1. Never give anyone your secret recovery phrase (the 12 or 24 words) or your private key. Sectors will never ask for them. **2.** Only use **sectoraorg.com**: check the address bar every time. **3.** Nobody from Sectors will message you first to “help” you. If someone does, it is a scam.

COMPUTER OR PHONE

Using a computer? Do it like this.

On a computer your wallet is a **browser extension** (Chrome, Brave or Edge). It opens as a small window at the top right.

- 1 **Install your wallet** in Chrome, Brave or Edge (for example MetaMask, only from its official website). Open it and unlock it with your password.
- 2 **Staking (Part A):** open sectoraorg.com/staking and press [Connect wallet](#). Press your wallet in the list (1). The wallet window opens at the top right: press **Connect (2)**.
- 3 **Node (Part B):** open sectoraorg.com/dashboard in the same browser, press [Connect wallet](#) and choose the **same wallet**.

(1) Your wallet in the list · (2) Connect in the wallet window.

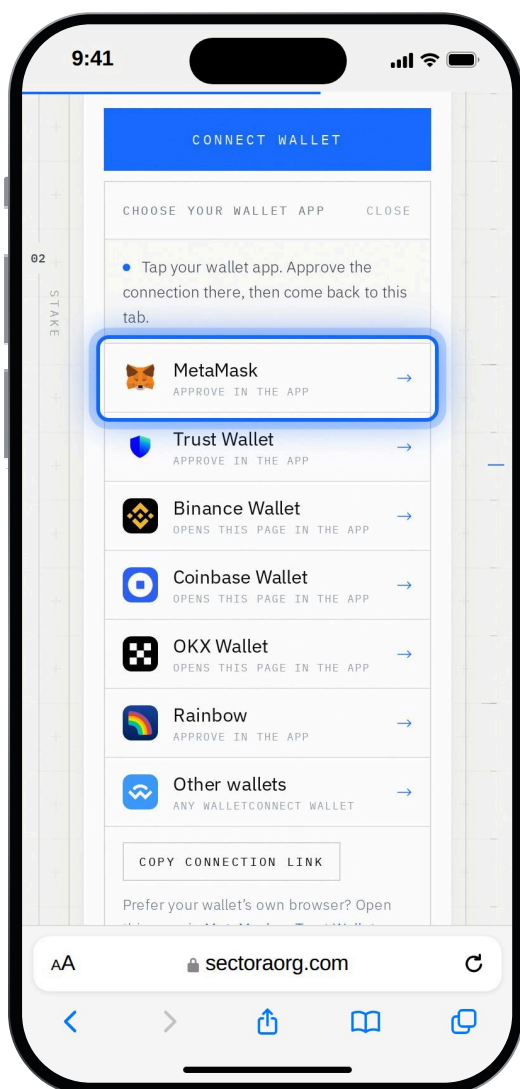

Don't see the wallet window? Click the puzzle icon at the top right of the browser, then your wallet. **No extension?** In the list, choose [Wallet on your phone](#) and scan the QR code with your phone.

ON A PHONE

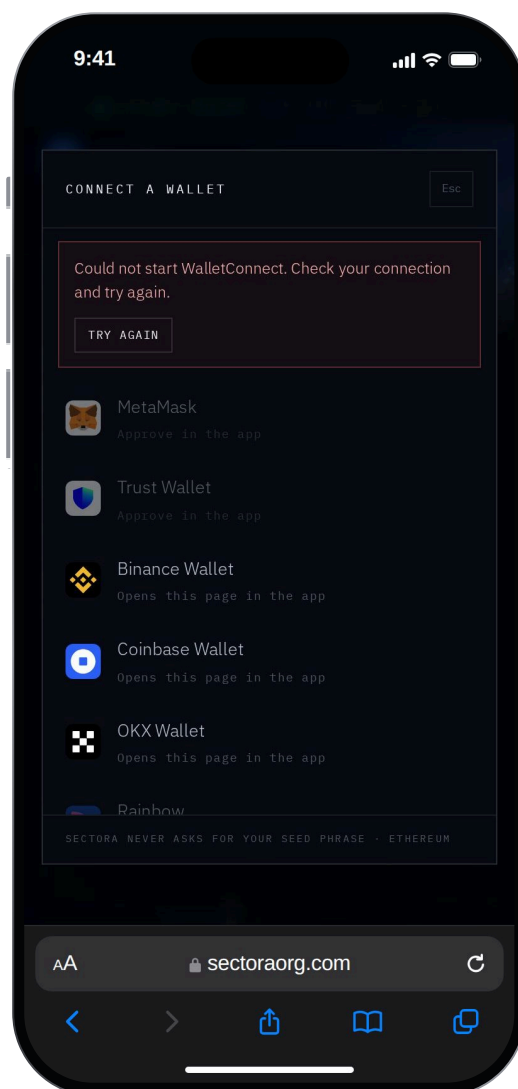

Using a phone? Read this first.

Everything in this guide works on a phone. You only need your wallet app installed (MetaMask, Trust Wallet, Coinbase Wallet...).

- 1 **Staking (Part A):** open sectoraorg.com/staking in Chrome or Safari and press [Connect wallet](#). Tap your wallet app in the list, approve there and come back to the browser.
- 2 **Node (Part B):** open sectoraorg.com/dashboard and press [Connect wallet](#). On a phone it shows [Open in MetaMask](#) (or your wallet): tap it and the dashboard opens **inside your wallet app**. Continue there.
- 3 **Inside the wallet app** everything connects directly. Use the same wallet app for everything.

sectoraorg.com/staking

sectoraorg.com/dashboard

i If the wallet app doesn't open, open it yourself, find its built-in browser (often called **Browser**, **Explore** or **Discover**) and type the address there.

PART A · STEPS 1-7

A

Stake your #SECT

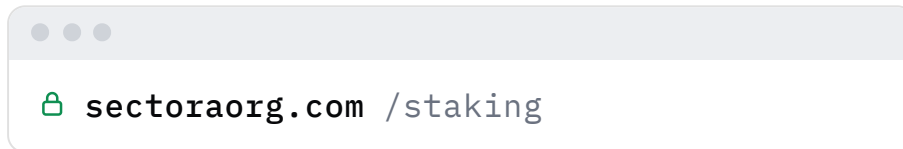

You put your #SECT in the official staking. They stay yours, earn staking rewards every second and count for the airdrop. Already staking? Skip to Part B.

01

STEP 1 OF 13 · BROWSER

Open the staking page

- 1 Open your browser: Chrome, Safari, or the browser inside your wallet app.
- 2 Type exactly **sectoraorg.com/staking** and open it.
- 3 Scroll down until you see the white box called “**Staking console**”.

⚠ Check the address bar. The only real page is **sectoraorg.com/staking**. If it says anything else, close it.

02 Press “Connect wallet”

STEP 2 OF 13 · STAKING CONSOLE

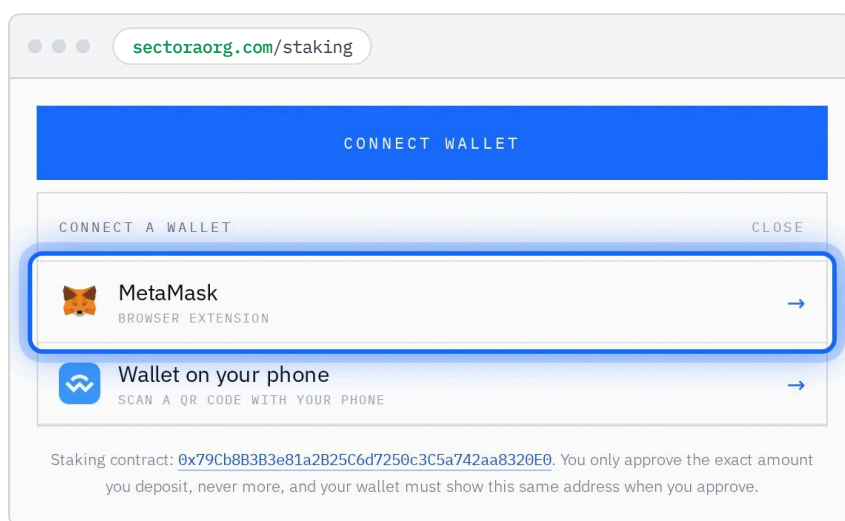

- 1 At the bottom of the Staking console there is a big blue button.
- 2 Press **Connect wallet**.

The Staking console. The button you press is marked in blue.

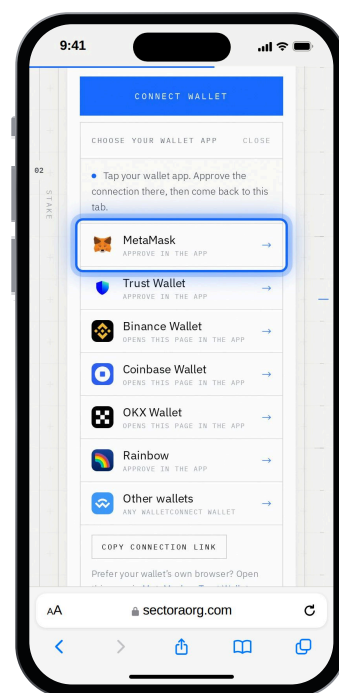

03 STEP 3 OF 13 · YOUR WALLET

Choose your wallet

- 1 A list opens under the button.
- 2 **On a computer:** press your wallet (for example **MetaMask**). Your wallet opens: press **Connect**.
- 3 **On a phone (Chrome or Safari):** tap your wallet app. The app opens: press **Connect** there, then **go back to the browser tab**.

On a computer: your browser wallet appears first.

On a phone: the list of wallet apps.

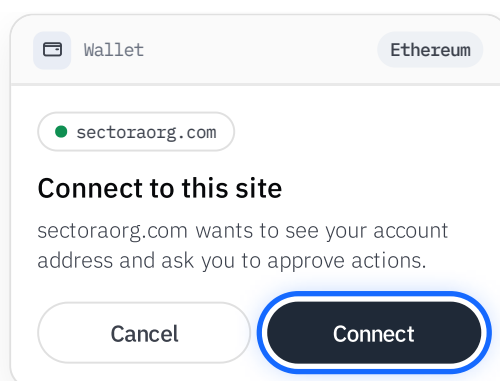

Illustration · your wallet may look a little different

04 STEP 4 OF 13 · CHECK

Check that you are connected

- 1 Look at the big blue button: it now shows **your wallet address**, short, like 0x4b2f...4b3c.
- 2 Under it you now see three buttons: **Deposit #SECT** **Withdraw** **Withdraw all**.

✓ **It worked** if you see your address on the button.

⚠ **Red message “Switch your wallet to the Ethereum network”?** Open your wallet, change the network to **Ethereum** (Ethereum Mainnet) and reload the page.

05 STEP 5 OF 13 · AMOUNT

Type how many #SECT you stake

- 1 Press the box “You deposit”.
- 2 Type the number of #SECT. Only the number, for example **1000**. No dots, no commas.

sectoraorg.com/staking

YOU DEPOSIT

1000 #SECT

1,000 10,000 100,000 1,000,000

EVERY SECOND	PER DAY	PER MONTH	PER YEAR
0.00000472 #SECT	0.41 #SECT	12.42 #SECT	149.00 #SECT

How much? At least **100 #SECT** to take part in the airdrop. The more you stake, the higher your level:

SCOUT 100 #SECT prize 55 SECT	SENTINEL 500 #SECT prize 325 SECT	GUARDIAN 1,000 #SECT prize 750 SECT	TITAN 4,000 #SECT prize 3,600 SECT · no maximum
---	---	---	---

06 STEP 6 OF 13 · WALLET · CONFIRMATION 1 OF 2

Press “Deposit #SECT” and approve

- 1 Press **Deposit #SECT**.
- 2 Your wallet opens and asks you to **approve** a “spending cap”. This only allows the staking contract to take **exactly** the amount you typed, never more. Nothing moves yet.
- 3 Check the details below, then press **Confirm** in your wallet.
- 4 **Wait**. Don't close the page. It takes from a few seconds to a minute.

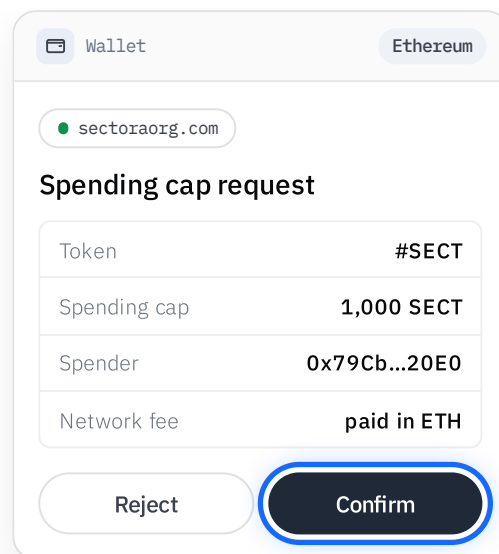

Illustration · your wallet may look a little different

CHECK THIS IN YOUR WALLET BEFORE YOU PRESS CONFIRM

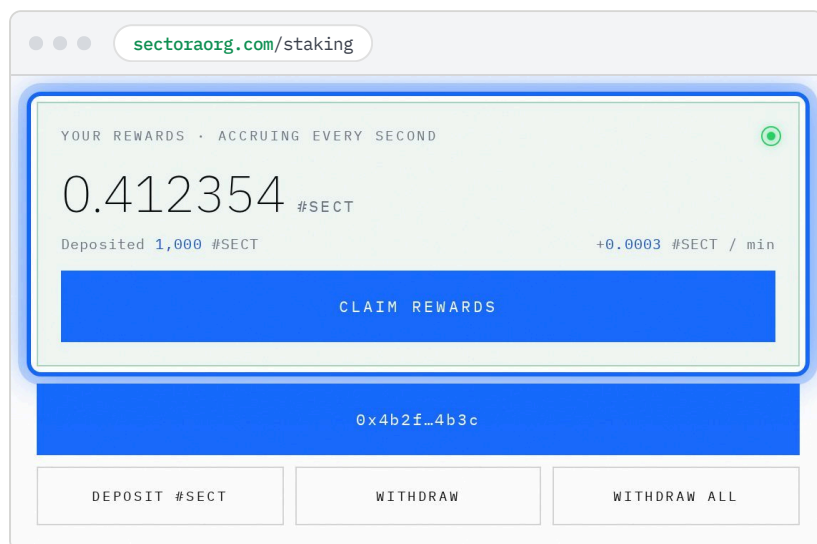

Request	Approve · spending cap
Amount	The exact #SECT you typed
Contract	0x79Cb8B3B3e81a2B25C6d7250c3C5a742aa8320E0
Fee	A small amount of ETH (your wallet shows it)

07

STEP 7 OF 13 · WALLET · CONFIRMATION 2 OF 2

Confirm the deposit

- 1 When the approval is done, your wallet opens **a second time** by itself, now for the **deposit**.
- 2 Press **Confirm** again. Wait a few seconds.
- 3 A green box appears: “**Your rewards · accruing every second**”, with “**Deposited**” and your amount.

Your staking is done: the deposit shows and your rewards grow every second.

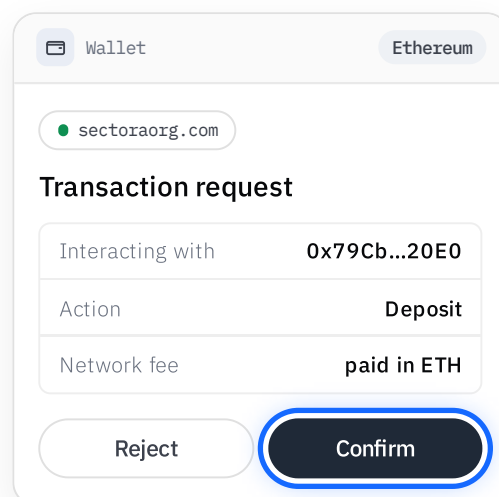

Illustration · your wallet may look a little different

⚠ Leave your #SECT in the staking. Only staked #SECT count for the airdrop. Keep them there until you complete your time. You still earn your normal staking rewards.

Part A done.

Your #SECT are staked. Now turn on your node with this same wallet.

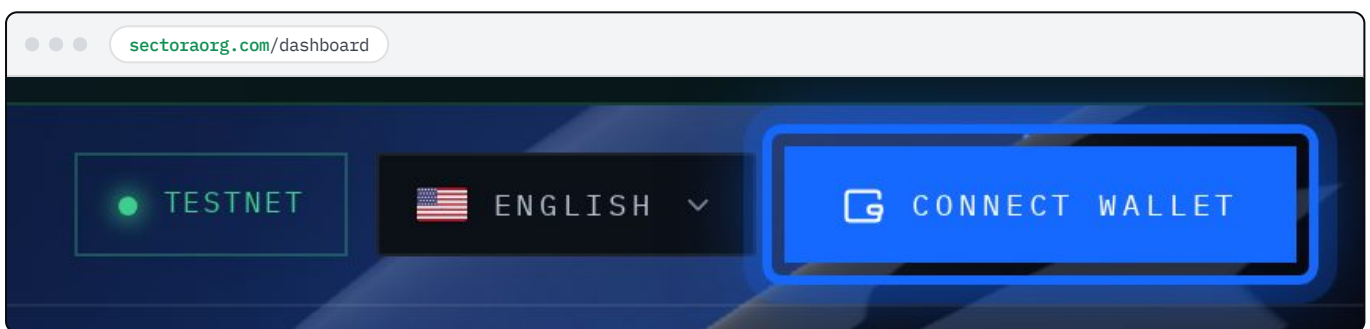

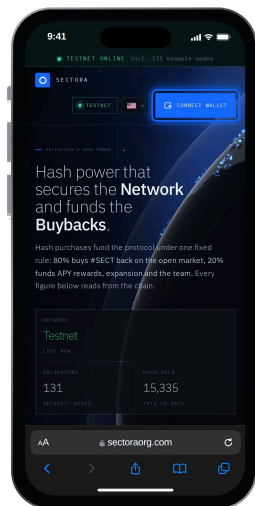

PART B · STEPS 8-11

B Turn on your Hash Node

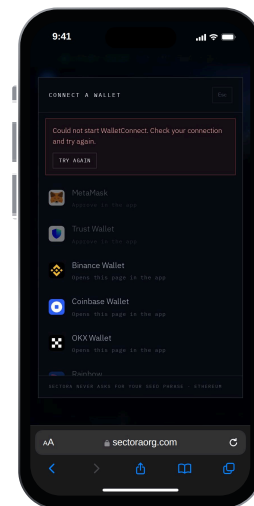

You connect the same wallet in the dashboard and your node turns on. **Everything in Part B is free:** no test coins, no network change, no signature and no gas.

08 STEP 8 OF 13 · DASHBOARD Open the dashboard and press “Connect wallet”

- 1 Open sectoraorg.com/dashboard.
- 2 At the top right, press [Connect wallet](#).
- 3 On a phone (Chrome or Safari): a list appears. Tap [Open in MetaMask](#) (or your wallet) and the dashboard opens inside your wallet app. Press [Connect wallet](#) again there.

On a phone: [Connect wallet](#) at the top.

On a phone without a wallet: [Open in MetaMask](#).

⚠ Use the SAME wallet you staked with. If your node is on another wallet, it does not count for your airdrop.

09

STEP 9 OF 13 · YOUR WALLET

Choose your wallet: your node turns on by itself

- 1 In the list “**Connect a wallet**”, press your wallet (it says **Detected**).
- 2 In your wallet, press **Connect**.
- 3 Nothing else to approve: **no signature, no network change and no gas**. The dashboard detects your city and **turns on your node by itself**.

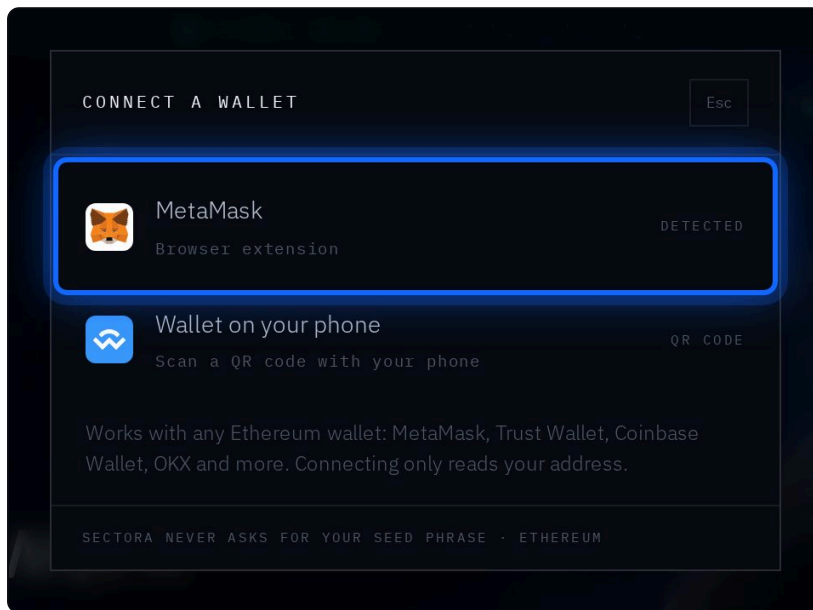

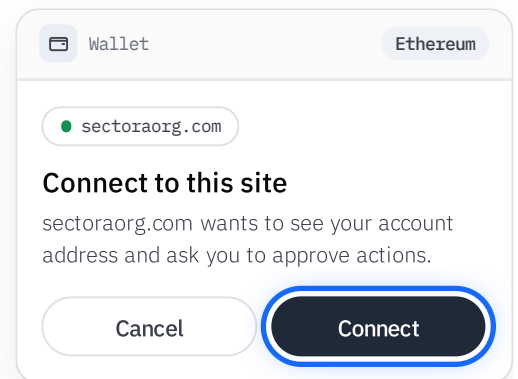

Illustration · your wallet may look a little different

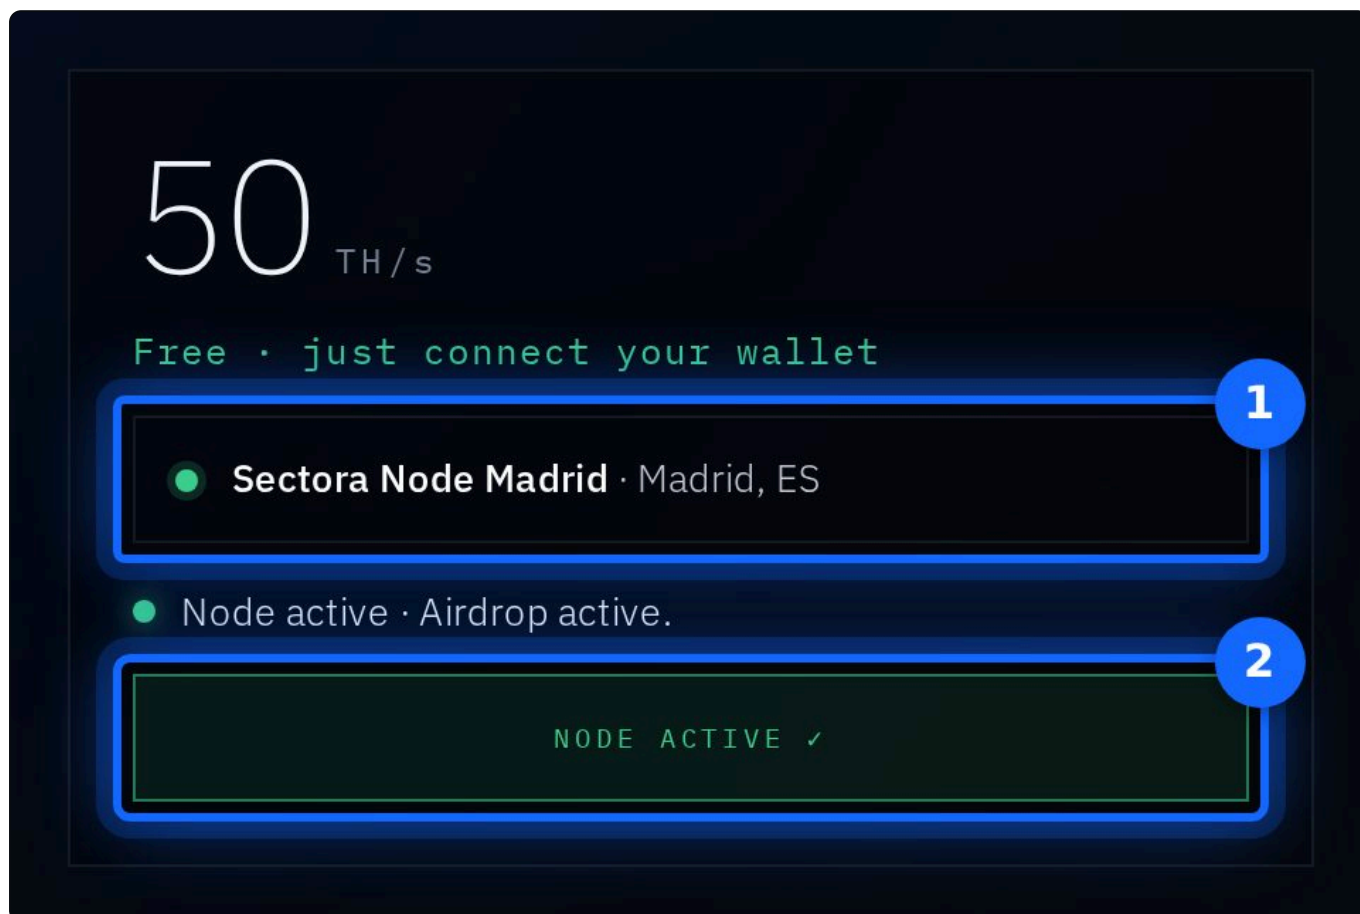

i Your wallet is on another network? It doesn't matter. You don't need Sepolia or test coins: the dashboard only reads your address.

10

Check that your node is active

STEP 10 OF 13 · YOUR NODE

- 1 Go down to the box with the **50 TH/s** plan.
- 2 You see your node's **name and city (1)** and **Node active ✓ (2)**.
- 3 Do you see the button **Activate my node** instead? Press it.

(1) Your node and its city · (2) **Node active ✓**

i About the location. The dashboard detects your node's approximate location from your connection. Only the **city** is used, **never your address**.

10

STEP 10 OF 13 · PLAN B

Check that your node is active

STEP 10 · PLAN B · ONLY IF YOU SEE "WE COULDN'T DETECT THE LOCATION. ENTER IT BELOW."

Why	Sometimes a VPN, an ad-blocker or a strict browser blocks the detection. Then two boxes appear: Latitude and Longitude .
Find the numbers	Open Google Maps and search for your city . On a computer, right-click the city center; on a phone, press and hold it. You see two numbers, like 40.4168 , -3.7038 .
Fill them in	The first number goes in Latitude (1). The second number goes in Longitude (2). Keep the minus sign if there is one.
Then	Press Activate my node (3). Your node turns on right away. Use your city, not your home.

50 TH/s

Free · just connect your wallet

● We couldn't detect the location. Enter it below.

Only an approximate location (city level) is used, never your address.

NODE NAME

Sectora Node MAD-1

LATITUDE

40.4168

LONGITUDE

-3.7038

● Type your city's latitude and longitude above, then press "Activate my node".

ACTIVATE MY NODE

Only when the location could not be detected: (1) [Latitude](#) · (2) [Longitude](#) · (3) [Activate my node](#)

11

STEP 11 OF 13 · DONE

Done: your node is on

- 1 Further down, in “**Your Hash Node**”, you see **Node on**, your node on the map and the airdrop console counting.
- 2 With your staking from Part A, the box “**Airdrop of this node**” shows what has been released so far, what your node will generate and that it is delivered at the launch of SectoraEVM.

The screenshot shows the Sectora dashboard at sectoraorg.com/dashboard. The main section, "YOUR HASH NODE", displays a green dot and the text "Node on". Below this, it states "Your node is on and your airdrop is active." and lists the following details:

- WALLET: 0x4b2f...4b3c
- NODE NAME: Sectora Node Madrid · Madrid, ES
- SECT IN STAKING: 1,000 SECT
- AIRDROP: Active ✓
- LEVEL: Guardian
- YOUR AIRDROP PRIZE: 750 SECT

Below the details is a box titled "AIRDROP OF THIS NODE" showing:

- RELEASED SO FAR: 0.000191 SECT
- THIS NODE WILL GENERATE: 750 SECT on completing your time
- DELIVERED AT THE LAUNCH OF SECTORAEVM
- A button labeled "AIRDROP PANEL"

To the right, the "NODE LOCATION" map shows a green dot in Madrid, ES (40.40°N · 3.70°W). Below the map is the "AIRDROP CONSOLE" with a "LIVE" indicator and a log of events:

- EARNED IN THE AIRDROP: 0.000191 SECT
- 19:13:20 node "Sectora Node Madrid" online · Madrid, ES
- 19:13:20 staking: 1,000 SECT
- 19:13:20 level Guardian · reward 750 SECT
- 19:13:20 airdrop active · 5 SECT per day
- 19:13:23 +0.000174 SECT · total 0.000177 SECT
- 19:13:23 [Progress bar]

YES

You can close the tab

Your node stays on in the network by itself.

YES

You can turn off your computer

Your node does not depend on your computer or your phone.

NO

Don't use another wallet

Your node and your staking must use the same wallet. A node on another wallet does not count.

Part B done. You are in the airdrop.

Staking + node on, with the same wallet. Your count is running.

PART C · STEPS 12-13

C

Check your airdrop

See your level, your prize and the three requirements, read live from the blockchain. Looking is free: no signature, no transaction.

12

STEP 12 OF 13 · MY AIRDROP

Open My Airdrop

- 1 Open sectoraorg.com/myairdrop.
- 2 Press [Connect wallet](#), or paste your wallet address and press [Check](#).
- 3 You see what you have earned so far, your **level**, your **prize** and the three requirements.

The screenshot shows the 'sectoraorg.com/myairdrop' web interface. At the top, it says 'VIEWING' followed by a wallet address '0x4b2f1c9d8e7a6b5c4d3e2f1a0b9c8d7e6f5a4b3c'. There are buttons for 'COPY', 'REFRESH', and 'CHANGE WALLET'. Below this, it says 'AIRDROP GENESIS REWARD' and shows 'LEVEL 3 · GUARDIAN' and 'HASH NODE · ON'. The main display shows '13.9169 SECT · EARNED SO FAR' with a progress bar indicating 'of 750 SECT when you complete your time'. Below the progress bar, it says 'WHAT YOU EARN IS SECURED ON NOV 26, 2026'. A table shows the current status: Level 3 Guardian, 1.0 Spots of Guardian, and a Prize of 750 SECT on completing your time. A note says 'With 3,000 SECT more in staking you become Titan and win 3,600 SECT.' At the bottom, there are three requirement status boxes: '100+ SECT in staking' (checked, 'You have 1,000 SECT in staking'), 'Hash Node on' (checked, 'On - you can close the tab or turn off your computer'), and '30 days inside' (not checked, 'Day 3 of 30 - then what you earn is secured').

Example: 1,000 #SECT staked = Guardian, prize 750 SECT.

THE THREE REQUIREMENTS

✓ 100+ SECT in staking	Done in Part A.
✓ Hash Node on	Done in Part B.
30 days inside	Starts by itself when the two above are true. Just wait and don't touch anything.

13

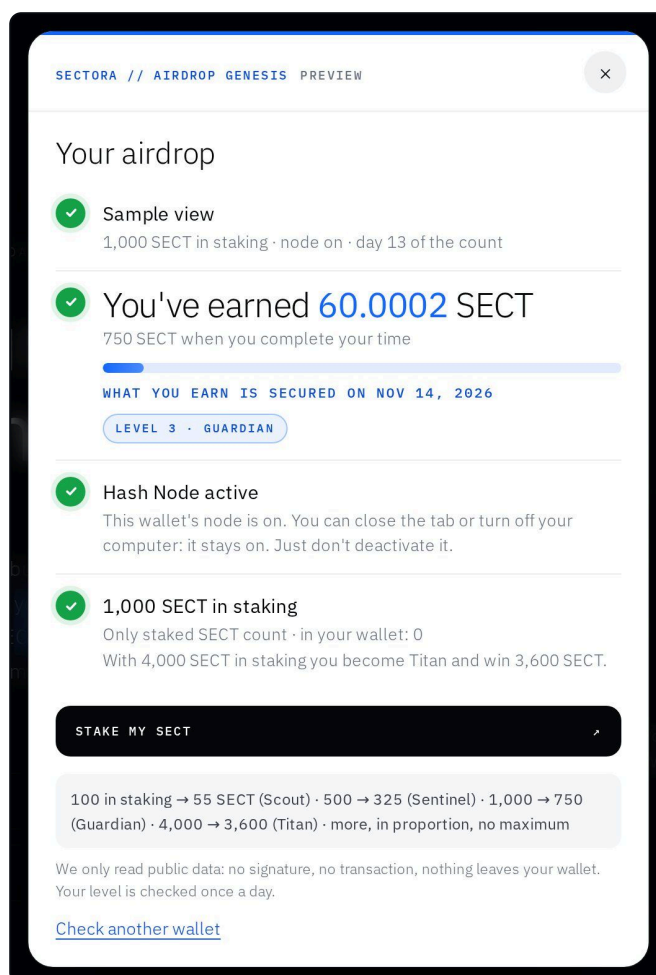

STEP 13 OF 13 · AIRDROP PAGE

Quick check on the airdrop page

- 1 Open the airdrop page, sectoraorg.com/airdrop, and press [Take part](#).
- 2 Connect your wallet. The window **“Your airdrop”** shows what you have earned so far, your prize and your level.

The airdrop page: press [Take part](#).

Example of the “Your airdrop” window.

- ✓ **When do I receive my SECT?** On SectoraEVM, at its mainnet launch. You will be able to follow it on SectoraScan.

PROBLEMS · QUICK ANSWERS

Something didn't work? [Look here first.](#)

“Not enough ETH” on the staking page

Part A uses real Ethereum. Add a little ETH (on Ethereum) to the same wallet and try again.

“Switch your wallet to the Ethereum network”

You are on the staking page with the wrong network. In your wallet, choose Ethereum (Ethereum Mainnet) and reload.

“You do not have that many #SECT in your wallet”

Type a smaller amount, or buy more #SECT with our buying guide.

I used a different wallet for the node

It doesn't count. Connect your **staking wallet** on the dashboard and repeat Part B with it.

The location wasn't detected, or it is wrong

If it wasn't detected, two boxes appear: follow Plan B in step 10. Use your city, not your home.

The wallet window didn't open

Open your wallet app or extension yourself: the request is waiting there. On a phone, after approving, go back to the browser tab.

My Airdrop doesn't show my node yet

Wait a minute and press Refresh. The activation is read right away and saved publicly every few minutes.

I already had a node from before (Sepolia)

Nothing changes: it keeps its date and its days. You don't have to activate it again.

Do I have to keep my computer on?

No. Once activated, your node stays on by itself.

Do I have to withdraw my staking to join?

No. Never. Your staked #SECT count as they are, and you keep earning your staking rewards.

Does Part B cost money?

No. Activating your node is free: no test coins, no gas and no signature.

SUPPORT

Still stuck? Write to us.

Send an email to our support team with the subject “Airdrop Connection”. To help you fast, include:

1. Your **public** wallet address (starts with 0x).
2. The **step number** where you got stuck.
3. A **screenshot** of the error.

EMAIL

support@sectoraorg.com

SUBJECT

Airdrop Connection

Never

send your recovery phrase (12 or 24 words) or your private key. Not to us, not to anyone.

**Three safety rules. Never break them.**

1. Never give anyone your secret recovery phrase (the 12 or 24 words) or your private key. Sectora will never ask for them. **2.** Only use **sectoraorg.com**: check the address bar every time. **3.** Nobody from Sectora will message you first to “help” you. If someone does, it is a scam.
